PH20002/PROM	PH Electrode	£34.74	£31.38

Air Pressure Kit

Description: A complete kit to teach many aspects of air pressure in a simple and straightforward manner. With the kit you can perform the following experiments:

- **The classic bell in a jar experiment
- **Magdeburg hemispheres experiment
- **Weighing air (requires balance – not supplied)
- **Guinea and feather (free fall in vacuum) experiment
 - **Boyle's Law
 - **Evidence of pressure
 - **Air pressure measurement
- **Air pressure effect – external pressure diminished
 - ** Air pressure effect – water boils at 60 degrees
 - ** Air pressure effect – internal pressure diminished

The kit does not require a vacuum pump and does away with trying to produce an air seal using Vaseline. All experiments are easy and quick to set up and give reliable and repeatable results.

Code AI10001/PROM

List Price £227.50

Promotion Price £209.98

Projection Colour Mixing Apparatus

Description: A self-contained kit to demonstrate colour mixing; Comprises three light projectors with lenses on flexible stalks which allow the user to project the standard colour mixing circles; Each colour intensity is individually adjustable from 0 to 100%; Extremely bright images mean that it may be used without a blackout; Allows up to 16.7 million colour combinations; Can be used to demonstrate primary and secondary colour mixing and coloured shadows; Supplied with a plug in power supply.

Code CO40001/PROM

Catalogue Price £53.16

Promotional Price £49.07
